GVE COMMERCIAL SOLUTIONS

QUANTITY SURVEYORS & COMMERCIAL CONSULTANCY

COMPANY PROFILE

We deliver commercial and contractual support throughout contract lifespans together with a range of QS services to tier 1 contractors and specialist subcontractors in construction and civil engineering.

We understand the diverse needs of each project integrating a highly professional service with cost-effective solutions.

SERVICES

Specialist Steel Contractors

We have extensive and recent experience of working with medium-sized steel fabricators across varied sectors including aviation, rail, building, ground engineering and temporary works.

Our key commercial support services include:

- **Pre and post-contract support** such as contract risk reviews, cost management and contract administration
- **Day-to-day site assistance** with early warnings, programme submissions, compensation events and formal communications
- **Expert advice** on civil engineering and construction contracts employing our specialist knowledge in construction contract writing
- **Dispute avoidance** and management of difficult commercial negotiations in order to resolve complex contractual matters
- **Dispute resolution** via adjudication and, if necessary, assisting with court claim procedures
- **NEC and JCT contractual training** for site teams including introductory and refresher courses, contracts and commercial awareness and graduate training

TESTIMONIALS

G&H Engineering & Diving Services Ltd

Gerry Hassell, Managing Director

"G&H Engineering & Diving Services Ltd is a specialist steelwork contractor in the aviation sector. 85% of all our contracts are based on the NEC format, and as such, contracts can be highly complex and complicated.

If any company has pre-contract queries or issues after the contracts have been signed, which leads to disputes or possible tribunals I would thoroughly recommend GVE.

They successfully defended an adjudication case for us and all aspects of their work is outstanding."

Fayat Piling Ltd

François Xavier Bailly, Country Manager

"Fayat Piling Limited would not hesitate to recommend GVE.

Their experience, professional knowledge and understanding of NEC mechanisms, and contracts, generally, makes GVE the right partner for difficult and complex commercial issues.

GVE has provided services to Fayat from their introduction to the UK market and throughout our major projects. This has included the training of our site management and senior international management team in NEC practice.

GVE is able to provide the right level of staff competence, tailored from director through to more junior QS levels and planners. GVE strikes the right balance of being both a support and a guide throughout a projects' lifespan."

McNealy Brown Ltd

Trevor Sanderson, Senior QS/Commercial Manager

"We have the proven confidence to be able to approach GVE at any time for prompt, professional, high quality contractual and commercial advice and assistance. They are able to emphasise and tailor the advice to the requirements and perspective of large specialist subcontractors.

We have similarly benefited from their provision of specialist NEC training, which is again tailored to the requirements of their individual clients. As an added benefit they also provide traditional quantity surveying services."
